

16

TWENTY-FOURTH ANNUAL ANNOURGEMENT

OF THE

CHICAGO MEDICAL COLLEGE

Medical Department of the Northwestern University.

Corner of Prairie Avenue and Twenty-sixth Street,

CHICAGO, ILLINOIS.

SESSION OF 1882-3.

CHICAGO:

CHAS. J. JOHNSON, PRINTER, 138 & 140 LAKE STREET.

1882.

FACULTY OF MEDICINE.

H. A. JOHNSON, A.M., M.D.,
Emeritus Professor of the Principles and Practice of Medicine and of Clinical Medicine.

E. ANDREWS, M.D., LL.D., TREASURER,
Professor of Clinical Surgery.

J. H. HOLLISTER, A.M., M.D.,
Professor of Clinical Medicine.

I. N. DANFORTH, A.M., M.D.,
Professor of Clinical Medicine.

R. N. ISHAM, M.D.,
Professor of the Principles and Practice of Surgery.

N. S. DAVIS, M.D., LL.D., DEAN,
Professor of the Principles and Practice of Medicine and of Clinical Medicine.

E. O. F. ROLER, A.M., M.D.,
Professor of Obstetrics and Diseases of Children.

S. J. JONES, A.M., M.D.,
Professor of Ophthalmology and Otology.

E. C. DUDLEY, A.B., M.D.,
Professor of Gynecology.

J. S. JEWELL, A.M., M.D.,
Professor of Nervous and Mental Diseases.

WILLIAM E. QUINE, M.D., SECRETARY,
Professor of General Therapeutics.

M. P. HATFIELD, A.M., M.D.,
Professor of Medical Chemistry and Medical Jurisprudence.

J. E. OWENS, M.D.,
Professor of Surgical Anatomy and Operations in Surgery.

O. C. DE WOLF, M.D.,
Professor of State Medicine and Public Hygiene.

CHRISTIAN FENGER, M.D.,
Professor of General Pathology and Pathological Anatomy, and Lecturer on Surgery of the Genito-Urinary Organs.

LESTER CURTIS, A.B., M.D.,
Professor of Histology and Practical Microscopy.

H. GRADLE, M.D.,
Professor of Physiology.

J. H. LONG, Sc.D.,
Professor of General Chemistry.

WALTER HAY, M.D., LL.D.,
Professor of Materia Medica.

F. C. SCHAEFER, M.D.,
Professor of Descriptive Anatomy.

A. G. PAINE, A.M., M.D.,
Lecturer on Dermatology.

FRANK BILLINGS, M.D.,
Demonstrator of Anatomy.

ANNOUNCEMENT.

The Collegiate year embraces a General Session for students, and a Special Session for practitioners.

THE GENERAL SESSION will begin on the last Tuesday in September, 1882, and close on the last Tuesday in March, 1883, at which time the Public Commencement will occur.

THE COURSE FOR PRACTITIONERS will begin on the last Wednesday in March, 1883, and continue four weeks.

THE COURSE OF INSTRUCTION.

The curriculum of study comprises three annual consecutive courses of lectures.

The First Year Course embraces Descriptive Anatomy, Physiology, Histology and Practical Microscopy, Materia Medica and General Chemistry.

The Second Year Course embraces Surgical Anatomy and Operations in Surgery; General Pathology and Pathological Anatomy; General Therapeutics; State Medicine and Public Hygiene; Nervous and Mental Diseases; Medical Chemistry and Medical Jurisprudence; Dermatology; Hospital and Dispensary Clinics.

The Third Year Course embraces Theory and Practice of Medicine and Clinical Medicine; Principles and Practice of Surgery and Clinical Surgery; Gynecology; Obstetrics and Diseases of Children; Ophthalmology and Otology, and daily attendance upon clinical instruction in the hospitals and dispensary.

REQUIREMENTS FOR ADMISSION.—Applicants for admission must give satisfactory evidence of at least a good English education. If an applicant presents a certificate of graduation from a literary college or from a scientific school or academy, it will be accepted in place of an examination; otherwise he must sustain an examination before a committee of the faculty.

ADVANCED STANDING.—During the last twelve years between eighty and ninety per cent. of the students of this college have passed through the regular three courses of instruction. Those who have completed one full year of medical study elsewhere, and who have accredited certificates to that effect, may be admitted to the Second Year Course by sustaining a satisfactory examination in the studies embraced in the First Year Course.

Those who present certificates of two years' study, and of attendance on one full course of instruction in some recognized medical college, may be admitted to the Third Year Course by sustaining satisfactory examinations in the subjects taught in the First and Second Year Courses.

EXAMINATIONS.—Those requiring preliminary examinations as to literary qualifications, must meet the Examining Board of the faculty during the first week of the regular term. Applicants for advanced standing, upon presentation of a certificate of eligibility from the Secretary of the College, will be examined by those professors whose chairs they desire to pass, during the third week in October.

Any who fail in this examination may have a second examination during the third week in December.

Daily examinations, or "quizzes", will be conducted during the entire term by each professor, in connection with his lectures.

The final examinations will occur during the week before Commencement.

At this time Third Year Students will be examined for graduation; Students of the second year, for admission to the Third Year Course; and Students of the first year for admission to the Second Year Course:

CONDITIONS OF GRADUATION.—Candidates must present evidence of the following qualifications.

- I. Good moral character.
- II. Three years' study.
- III. Age, twenty-one years or over.
- IV. Attendance upon two or more courses of lectures, the last of which must have been in this college.
- V. Dissection of three parts of the human body.
- VI. Two years of hospital attendance.
- VII. All examinations must have been passed.
- VIII. Deposit with the Secretary, by February first, of a satisfactory thesis.

Students from other colleges must also deposit certificates as to qualifications, numbers IV, V and VI.

FEES. —Lecture fees for the College Year.....	\$75.00
Final examination fee, (not returnable).....	30.00
Matriculation fee,.....	5.00
Demonstrator's ticket,.....	5.00
Laboratory ticket,.....	5.00
Mercy Hospital ticket,.....	6.00

All fees must be paid to the treasurer in advance. Students who have paid for two full courses of lectures in this college, are entitled to attendance upon subsequent courses, without charge for lecture fees.

CLINICAL ADVANTAGES.

A distinguishing feature of the college is the prominence given to clinical instruction by dividing the classes into small sections, and bringing each student into personal contact with patients.

COLLEGE CLINICS.

The college clinics are arranged as follows:

On Wednesday,	EYE AND EAR CLINIC,	PROFESSOR JONES.
On Saturday,	NEUROLOGICAL CLINIC,	PROFESSOR JEWELL.
On Saturday,	DERMATOLOGICAL CLINIC,	DR. PAINE.

Diseases of special interest are here presented and described, surgical operations are performed in the presence of the class, and clinical teaching in the special departments is thus illustrated by the presence of a large number of patients.

MERCY HOSPITAL.

Mercy Hospital, adjoining the college building, is an elegant structure, affording ample means for the study of all varieties of acute disease. Daily instruction is given in the wards at the bedside of the patient, or in the amphitheatre. The hospital is attended by members of the college faculty only.

Every member of the senior class has an opportunity of serving for an allotted time as dresser in the hospital, for which he receives a certificate at the end of the session. Senior students have the privilege of attending obstetrical cases, under the supervision of the Professor of Obstetrics.

The following members of the faculty comprise the hospital staff:

MEDICAL DEPARTMENT is represented by Professors N. S. Davis, J. H. Hollister, William E. Quine and Lester Curtis.

SURGICAL DEPARTMENT: Professor E. Andrews.

Assistant, E. Wyllys Andrews.

WOMAN'S DEPARTMENT: *Obstetrician*, Professor E. O. F. Roler; *Gynecologist*, Professor E. C. Dudley.

SOUTH SIDE DISPENSARY.

The South Side Dispensary is located in the college building. Thousands of patients annually apply here for treatment.

There are eight departments, viz: medical, surgical, gynecological, eye and ear, neurological, throat and chest, children's, and skin, with separate rooms where the different forms of disease are treated. The clinical class is divided into small sections, and for an allotted time each section is assigned in regular order to each of the departments. Students here become familiar with the methods of examination and treatment not only of diseases in general, but of specialties also.

St. Luke's Hospital on Indiana Avenue, between 14th and 15th Streets, within ten minutes' walk from the college, is the most centrally located of any in the city, and receives a large number of accident cases. Medical and surgical clinics are held there during the sessions. Professors Johnson, Jones, Owens and Danforth are members of the hospital staff.

There is now in contemplation a series of new buildings which will afford increased facilities for clinical teaching and post-mortem study. A commodious amphitheatre is included in this plan.

MICHAEL REESE HOSPITAL.

This new and elegant Hospital is on the lake shore at the foot of Twenty-Ninth Street, within five minutes' walk from the college. Professors Johnson and Gradle are members of its staff.

COOK COUNTY HOSPITAL.

Cook County Hospital on the corner of Wood and Harrison Streets, with which Professors Isham, Hollister, and Fenger are connected, admits all medical students on equal terms.

INTERNES.

Positions as Resident Physician are obtained by competitive examination in the following hospitals; Mercy, St. Luke's, Michael Reese, Cook County, and the Cook County Insane Asylum.

FACILITIES FOR INSTRUCTION.

The college is a commodious structure containing everything needed for the complete illustration of all the departments.

It is provided with two large lecture rooms, or amphitheaters, so that instruction may be given to different classes during the same hour.

THE ANATOMICAL DEPARTMENT of the college affords the best opportunities for the study of anatomy. The dissecting

rooms are of approved construction, and the facilities for the preservation of material are such that the supply exceeds the demand.

THE CHEMICAL LABORATORY is well appointed, and every student is there familiarized, by practical work, under the direction of the professors, with the essentials of both general and medical chemistry.

Especial attention is given to urinalysis, medico-legal chemistry, and the detection of adulterations. A small fee is charged, barely sufficient to cover the expense of the material used.

MICROSCOPY.—The college is supplied with microscopes, and students are trained by the Professor of Histology in the study of healthy and diseased tissues.

MUSEUM.—The college museum contains a large collection of anatomical and pathological preparations, casts and models, as well as numerous specimens in comparative anatomy, and a valuable cabinet illustrating *materia medica*.

PRIZES.

Faculty Prizes.—The Dean of the College offers, annually, a prize for the best thesis presented by the graduating class, as decided by a committee of the faculty.

Alumni Prizes.—The Alumni Association offers a prize of fifty dollars, to be awarded to that member of the graduating class of 1883, who shall have attained the highest general average of scholarship in all the branches.

The Senn Prize.—Dr. N. SENN, of Milwaukee, in behalf of the Alumni Association, offers, annually, a standard medical or surgical work, to be awarded for the best anatomical preparation. The Senn prize is open for competition to all graduates and students of the Chicago Medical College.

At the last meeting of the Alumni Association, the sum of fifty dollars was voted as a prize to the author of the best thesis upon either of the following subjects:

- I. Comparative value of the more recent antiseptics.
- II. Changes produced in the urine by the use of various remedial agents.
- III. Means of lessening infantile mortality.

This prize is open to all members of the association who have paid their dues. Each essay must be without the writer's proper name, but must be accompanied by a sealed envelope containing the author's name and address. Both essay and envelope must bear the same motto, or device.

All preparations or essays intended for competition must be in the hands of the Secretary of the Association, Dr. HENRY T. BYFORD, 125 State street, Chicago, on or before February 1st, 1883. The preparations are to be regarded as the property of the college museum.

The prizes will be awarded by the Committee on Prize Essays, appointed by the Alumni Association.

ARTHUR EDWARDS, D.D., of Chicago, also offers a prize for the highest excellence in all the studies of the first and second years, open to second year class.

Messrs. W. H. BULLOCH, of Chicago, and J. W. GRUNOW, of New York, offer a prize of a fine microscope and three objectives to that candidate for graduation from any college in the city, who shall pass the best examination in the theory and practice of microscopy. Details of competition for this prize will be furnished on application to Prof. LESTER CURTIS.

TEXT BOOKS.

Anatomy—Gray, Wilson.

Dissectors—Holden, Cunningham.

Physiology—Foster.

Histology—Frey, Stricker, Satterthwaite.

Microscopy—Frey, Beal, Seiler.

Materia Medica—National Dispensatory; The United States Dispensatory; Pharmacographia, by Flueckiger & Hanbury.

Pathology—Rindfleisch, Billroth, Wagner, Cornil and Ranvier, Green.

Chemistry—Attfeld, Roscoe, Fowne, Elliott and Storer.

Surgery—Erichsen, Hamilton, Bryant, Agnew.

Obstetrics—Leishman, Cazeaux, Playfair, Lusk.

Diseases of Children—Smith, Day.

Toxicology—Woodman and Tidy, Taylor, Reese.

General Therapeutics—H. C. Wood, Bartholow, Gubler, Ringer.

Practice of Medicine—Davis, Flint, Bartholow.

Diseases of the Eye—Williams, Wells, Carter.

Diseases of the Ear—Burnett, Roosa.

Nervous Diseases—Hammond, Ross.

Gynecology—Emmet, Skene, Thomas, Byford, Spencer Wells Barnes.

SELECTION OF SEATS.

The seats in the lecture rooms are numbered, and students who have matriculated, may make selection for the current year. Those

who wish to matriculate by mail, and send matriculation fee, may, if they so desire, have assigned to them the best seats which are not already reserved.

Reserved seats will be forfeited if not occupied by the end of the second week of the term.

BOARD.

The price of board and lodging will vary from \$4 to \$6 per week. Vacant rooms for those who desire to board and lodge themselves may be had at prices ranging from \$6 to \$10 per month.

For further particulars, address Professor N. S. DAVIS, Dean, 65 Randolph street, or Professor WM. E. QUINE, Secretary, 3151 Wabash avenue, Chicago, Illinois.

PRACTITIONERS' COURSE.

This course is designed for the special benefit of practitioners, and is entirely distinct from the regular course for students. It will commence on the day following the public commencement, and continue four weeks. A prominent feature of this course will be its clinical teaching in the dispensary, and at the bedside in the hospitals, illustrating by selected patients the most approved methods of treatment, not only in medicine and surgery in general, but in gynecology, nervous diseases, ophthalmology and otology, and other specialties.

From two to three hours each day will be devoted to clinical instruction. A practical course in surgical anatomy will afford a valuable opportunity for reviewing this important subject.

The dissecting room will be at the disposal of those who wish to review anatomy, and the supply of material will be abundant.

Practical work in the chemical and histological laboratories may be pursued by those who desire.

A special course will be given in pathological anatomy, illustrated by diagrams and with microscopes, giving the latest views and discoveries in pathological histology. Special courses of didactic lectures will also be given, having reference to the needs of those who desire to make a thorough review of their professional studies.

A programme of the course will be issued in January, and will be mailed to any address upon application to the Secretary of the college. The fee for the entire course is thirty dollars; for any particular department of the course, ten dollars, to be paid in advance to the Treasurer of the college.

This course, which the Chicago Medical College was the first to inaugurate, is no longer an experiment, but a permanent feature of the institution.

GRADUATING CLASS.

1882.

E. C. Abbott,	C. M. Gould,	W. C. Ohlendorf, Ph.G.
C. H. Barr,	M. C. Green,	W. H. Palmer,
